

I strongly oppose this proposal. If this proposal is adopted smaller training centers and other aviation business will be forced out of business due to the additional financial requirement of an ODA. This will therefore affect employment in an aviation community that is already suffering from financial hardships since Sept 11, 2001. Additionally, this proposal will cause a reduction in the number of FAA Inspectors and therefore also affecting the aviation industry in a negative manner. Because of the negative affect on the aviation community in the United States, this proposal is not in the best interest of neither aviation or the US economy.
